## How It Works!

Crafted and hand-welded from the finest available "304 Cooking Grade" stainless steel, with a powerful 1800 Watt heating element. Electrically operated, no coal or gas!

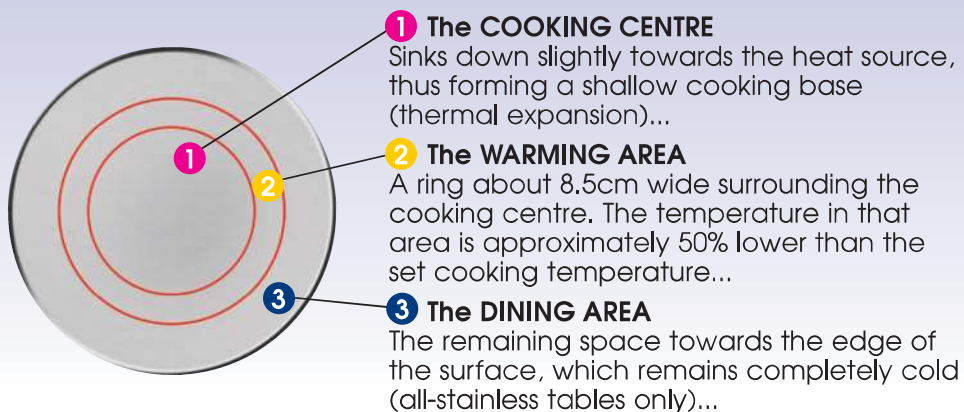

Cook-N-Dine tables are unparalleled in quality, style, versatility and timeless elegance....with an amazing new feature...

...**Not in operation**, the table surface is absolutely flat and even.

...**When on**, the centre gently bows downwards approximately 20mm.

...**During operation**, the one-piece surface divides into three (3) different temperature sections.

**1 The COOKING CENTRE**

Sinks down slightly towards the heat source, thus forming a shallow cooking base (thermal expansion)...

**2 The WARMING AREA**

A ring about 8.5cm wide surrounding the cooking centre. The temperature in that area is approximately 50% lower than the set cooking temperature...

**3 The DINING AREA**

The remaining space towards the edge of the surface, which remains completely cold (all-stainless tables only)...

Material: Heavy gauge (8-10) Food Grade German Stainless Steel, Type 304, cold pressed and hand-welded. Available in 115V or 230V. Power max. 1800 Watt, 8 AMP, 50/60 Hz. Usage 1.2 KW/h.
